

WE ARE COLORING THE FUTURE.

Sakura Color Products Corporation is celebrating our 100th years of history since its founding in 1921.

These 100 years were those of innovation and continuous challenges to live up to our corporate motto "Our company contributes to education and culture."

Our history of innovation started with the world's first oil pastel "Cray-pas"® in 1925, followed by the world's first water-based pigment ink "Pigma"™ in 1982 and the world's first gel ink ballpoint pen "Ballsign"™ (or "GellyRoll"™ outside Japan) in 1984.

We at Sakura consider it our charge to provide innovative products, enabling every student and artist, both amateur and professional, to experience the joy of creative expression at affordable prices.

With our products, we also serve the needs of industrial and business use across various industries such as manufacturing, medicine, cosmetics, and so on.

It is our great pleasure to put this catalog into your hands, in the hope that we can further advance our corporate vision: The colors of Sakura products will enrich the lives of the people of the world, now and forever – We Are Coloring the Future.

	Less odor
	This mark is the ECOfeel mark which indicates a product has been designed to be environmentally-friendly.
	Products bearing this symbol have been evaluated in the US by a toxicologist to certify that they do not possess more than the allowable level of materials toxic to humans, and have received certification from ACMI (Art & Creative Materials Insititute) in regard to material safety.
	Products bearing the ISO symbol meet the Toy Safety Regulation, ISO8124 part 3 of the "International Organization for Standardization". All our products that bear the ISO8124-3:2020 symbol are strictly designed and produced to meet the limits of element migration.

The line width values listed are approximate.

Innovative water-based pigment pen, PIGMA is the best choice for Manga and illustration drawing. The world's first water-based pigmented ink PIGMA was invented by Sakura Color Products Corp. in 1982.

- Ink dries quickly.
- Ink does not bleed through the thinnest paper.
- Archival quality ink: waterproof, chemical-proof and fade resistant.

Ideal for Illustration

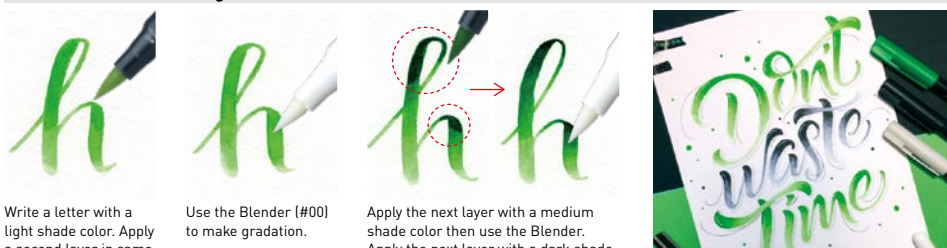

Outline with the Pigma Micron. Use pale colors for the base layer.

Paint dark colors over the base layer. Paint shadow colors on the top layer.

Extend with the Blender (#00). Try adding different color.

Use the Blender for gradation effect. Pigma Micron and Koi Coloring Brush Pen make a good combination.

Ideal for Brush Lettering

Write a letter with a light shade color. Apply a second layer in same color.

Use the Blender (#00) to make gradation.

Apply the next layer with a medium shade color then use the Blender. Apply the next layer with a dark shade color and then use the Blender.

Color blending gives a fantastic effect. Artwork by @leuke.letters

High water-solubility allows easy color blending. Easy control of thick & thin strokes by hard type nib. Artwork by @akimichi2012

WATER COLORS

Water Colors

Transparent water colors in travel kit.

Case ABS
Set-box Paper
Inner tray PS

Wet-on-Wet
(make gradation)
Wet a paper with a brush which includes only water, and add colors before the paper dries.

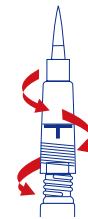

Wet-in-Wet
Before the color firstly painted dries, drop a color with different color tone and depth, and bleed colors.

Lift-Out
Before a color dries, wipe off a color by tissue. Clouds and so on can be expressed.

① Remove black cap from reservoir barrel and fill with water

② Screw brush on barrel (counter clockwise)

③ Gently squeeze water through brush fibers

Process of landscape painting

① Separate light/dark parts with two light/dark yellow colors as undercoating.

② On yellow undercoat, paint blue colors on sky, a building and trees. By painting blue on yellow, can make clear green.

③ Paint a red color on the roof and wall of a building, a deep green color on trees. By painting various colors, appear the depth of colors and solidities.

④ Completion: Applying finishing colors on each part. To adjust entire light-dark, make light parts lighter and dark parts darker.

**Half Pan Refill
for Koi Water Colors**

How to replace half pans:

1. Insert water into the pan slot and leave it for 24 hours.
2. Use a tooth pick to remove all the paint residue and wipe clean with tissue.
3. Peel off the release paper from the refill and insert it to the clean pan slot.
